Climbing assist rails are available in both surface mount (3.5" flange) or sub-surface mount versions. Climbing assist rails are available in standard 24", 36" and 48" lengths. Custom rails are available.

Surface Mount 3.5" Flange:

Sub-Surface Mount:

C. ANCHOR/SUPPORT SYSTEM

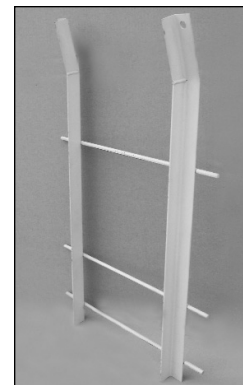

The Construction Anchoring/Support System is comprised of: seating section support that will be placed into concrete pier of 12" long x 36" wide x 24" deep (contractor provided), or minimum 24" diameter tube. The vertical 15° and 30° anchors will attach to connection points specified during our design process, and are placed into concrete piers that are 12" long x 24" wide x 24" deep (contractor provided), or minimum 24" diameter tube. The anchor/supports are powder coated black at the factory for protection. Determination of the quantity and placement of the anchors will be done within the CAD process.
